Dear Community Members of OLMC Primary School,

I write to offer our thanks and congratulations to all those in the Our Lady of Mount Carmel community for what was achieved during the primary years schooling of those OLMC students who graduated as Mount Carmel Year 12s in 2014. We are extremely proud of the outstanding academic achievements of our 2014 students and believe the staff of OLMC Primary School who led their academic development throughout their Primary years should feel likewise.

Mount Carmel College achieved a 100% SACE attainment level for its 81 Year 12 students in 2014. This amazing achievement of the ultimate secondary success for every student, well above the state average for SACE attainment, is a reflection on all those teachers who have impacted on these students’ schooling life Reception – Year 12.

Additionally, the College is delighted to share with you the successes of our students in:

- High levels of academic achievement across Year 12 subjects that saw great levels of success in attainment of preferred options for tertiary study. 95% of all Stage 2 enrolments were resulted in A-C grade bands by the SACE Board, with 60% of these results being in the A or B grade bands.
- A 100% success rate for students completing the compulsory Year 12 subject of Research Project.
- Ever growing levels of attainment of nationally recognised qualifications in Vocational Education and Training being incorporated into students’ SACE completion through access to the new Rosewater Trade Training Centre on site.
- Successful entry to University in 2015 for an 89% of students who applied through the South Australian Tertiary Admissions Centre. This included a staggering 80% of these students who applied for University entry who, due to their excellent results, were accepted into their first preference of their five course priority list. These courses included degrees in Information Technology, Computer Science, Education, Molecular Biology, Health Sciences, Psychological Science, Design, Laboratory Medicine, Arts, Media, Architecture, Journalism, Science, Nursing, Business, Biotechnology, Event Management, and Engineering.
- And, above all, a group of 2014 students who graduated as happy, well-rounded individuals able to celebrate the academic success which was the reward of their labours.

The outstanding achievements of our 2014 Year 12 students, coupled with the significant redevelopment of the College site through three major building projects totalling over $7 million in the last three years, situates the school as an ideal secondary education option for Catholic families seeking a quality secondary education right here in the midst of the western suburbs where we live. Come and see us on the College Open Night, from 4-7pm on Wednesday February 25.

Mount Carmel College again thanks all those in the Our Lady of Mount Carmel community who contributed to the success of last year’s students and we look forward to working with the graduates of OLMC for many years to come.

Gavin McGlaughlin
Principal
Mount Carmel College
